

MAXX® One Design Racing Black Aramid Laminate

Maxx cross cut laminate for dinghy sailors

MAXX® One Design Racing Black Aramid Laminate for cross cut sails is a favourite among dinghy sailors at Olympic, international, national and club level. This stable Maxx® Racing laminate has proved itself time and again to be both versatile and long lasting on racecourses all over the world.

The fibres in Maxx® laminates are laid at varying angles so that the sail forces are distributed evenly over the horizontal panels of the sail. The result is superior shape holding and efficiency over a wide range of wind conditions.

Thanks to continuous innovation in collaboration with sailmakers and yachtsmen throughout the world, we have successfully developed a technologically sophisticated range of laminated sailcloths that meet the highest demands of modern sail design.

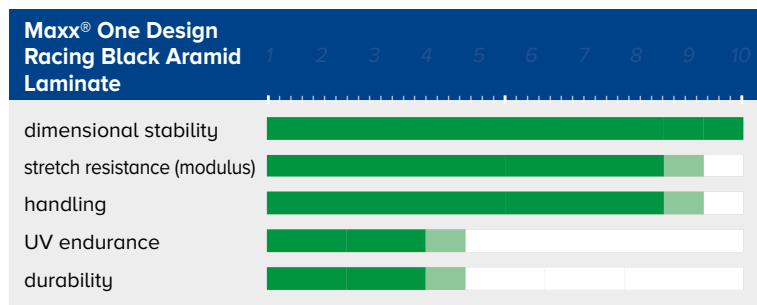

MAXX® One Design Racing Black Aramid Laminate

Our patented fibre layout ensures efficient support and distribution of the loads experienced by your sail. The effect of this fibre layout is to reduce the load on the Mylar film which helps the sail to retain its shape longer.

Black Aramid fibres for **maximum performance** and improved UV resistance.
